Federico Zivolo
Front-End Developer & UI Designer

Hi, I'm **Federico**!
I'm a **Front-End Developer** and **UI Designer** fell in love with web technologies.

I love to write **JavaScript**, expecially when I can use it to create awesome interfaces thanks to my extensive **CSS** knowledge.

Professional Skills

HTML & CSS

JavaScript

UI Design

UX Design

Softwares & co.

jQuery

Node.js

Photoshop

Illustrator

Ember.js

Sketch 3

React.js

★ My Projects

Most of the best things I have done in my career are open source projects, these are my favourites:

Bootstrap Material Design   ★ 15k
fezvrasta.github.com/bootstrap-material-design

When I first seen the Google I/O where Material Design was presented, I instantly fell in love with it!
Unlickily, the only viable way to easily use it in a web project was Polymer.
I told myself "*There must be an easier way!*" so I have created Bootstrap Material Design. An easy way to adopt Material Design in your Bootstrap application.

Popper.js   ★ 2k
popper.js.org

Every single time I have to work with tooltips and popovers, I have to find tricky ways to make them work as I expect.
Popper.js is the result of years of experience with them: an easy way to manage tooltips and popovers in your web application.

✓✓ Work Experiences

Front-End Developer & UI Designer
March 2015 - Present

I'm working at **Sysdig** as Front-End Developer and UI Designer, in the Sysdig Cloud team.
My role is to design new features and then implement them in an Ember.js application.

Front-End Developer & UI Designer
December 2014 - March 2015

I worked at **GovWhiz** as Front-End Developer and UI Designer. My role was to prorotype pieces of UI with JavaScript and help with the conversion in Angular.js.
I also designed the UI of a web-application and an Android application.

Full Stack Developer
September 2013 - December 2014

I started at **Progetto 2000** as PHP developer but I quickly switched to a new project written with JavaScript and Node.js.

There's a lot more!

This is just a resume, if you want to learn more about me please visit my portfolio or my social pages!
Or, even better, send me an email to arrange a meeting.
